

RESEARCH2REALITY

Shining a light on research & innovation.

Finally, Some Environmental Good News!

| Transcript of Voiceover narration

We all share this planet. Our food, water, and air depend upon its health. Understanding how it's changing is essential for survival. The environment is bigger than our borders.

Canadian university researchers are finding ways to help trees adapt more quickly to the changing climate. They are studying how changes in the soil and Arctic affect our forests and water. And they are unearthing important data from the Canadian Arctic about how our water supply is affected by climate change.

Canadian university researchers are finding ways to help us navigate our uncertain future. Come meet them.

TODAY'S RESEARCH. TOMORROW'S REALITY.
